

United Way Community Resource Directory

The United Way Community Resource Directory lists close to 1,000 organizations providing more than 5,000 services in Harris and 12 surrounding counties. It is generated from the comprehensive database that is used by the United Way HELPLINE for information & referral. It is available in printed form or on CD.

Order Your Community Resource Directory Today

Directory in Print

The 2007-2008 edition of the print directory is now available. The cost is \$45.00. (This cost includes shipping and handling.)

Directory on CD

United Way's Community Resource data is also available on CD. It includes the resources listed in the print directory. Searches can be made by keyword combined with a geographical location (city or zip), as well as by organization and program name.

At the time of shipment, the Directory on CD package contains all the current resources in the United Way Community Resource database. Because the Community Resource database information is constantly changed and updated, the Directory on CD is sold with a one-year site license that expires one year from the date of installation.

This one-year site license allows for the package to be installed on one network or multiple single-user computers at one site. At the end of the year, access to the resource information expires. You will need to purchase a new Directory on CD package. The cost of the Directory on CD is \$75.00 for a current resource data and program package with a 1-year site license.

NOTE: The Directory on CD is copyrighted and in "read only" format. The data cannot be accessed to create or print labels or reports.

Technology Requirements

It is recommended that individual PC workstations should be Pentium 200 or higher with a CD ROM, 32MB of RAM, and 100MB of hard disk space.
